Internet backbone top-ranked in the industry¹

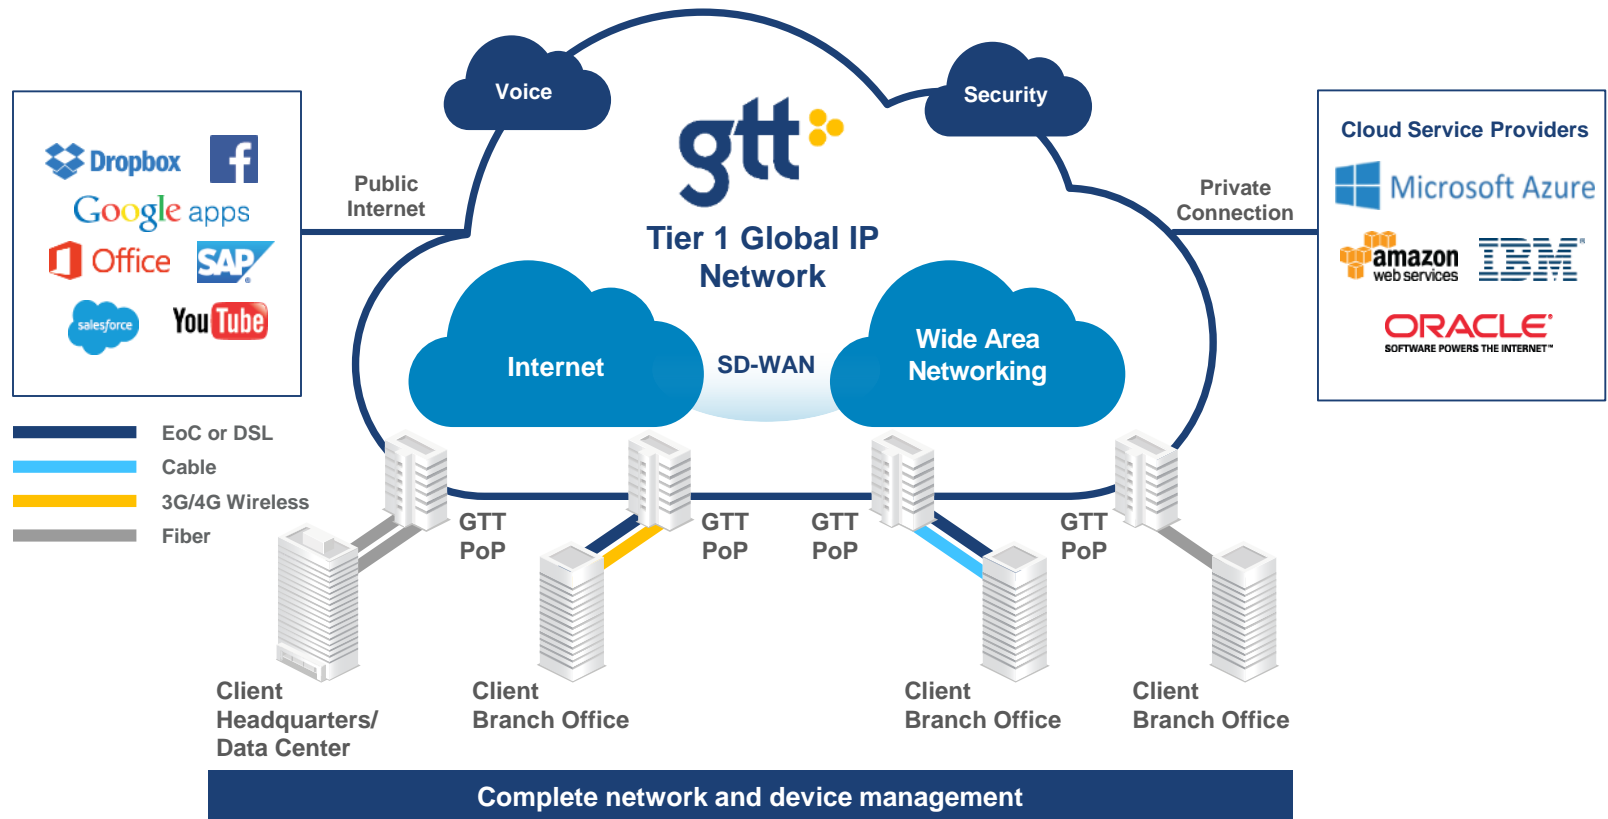

200,000+

End-point devices under management

3,500+

Regional partners for diverse, secure local loop access

Any Location. Any Application.

Core Network Connectivity

- Points of Presence (PoPs) in most major carrier neutral data centers worldwide
- PoPs are connected via a combination of owned and leased routes
- Not specific to client contracts; based on aggregate traffic demand

Diverse, Secure Last Mile Access

- Leased fiber, copper, cable, wireless connections
- Typically leased back-to-back with client contracts
- Substantial majority of monthly network spend

Key Trends Driving Demand Growth

GTT helps companies connect people across organizations to any location in the world and to every application in the cloud

↑ Apps & Data per App

Non-GAAP Financial Information

GTT GAAP to Non-GAAP Reconciliation

In addition to financial measures prepared in accordance with accounting principles generally accepted in the United States ("GAAP"), from time to time GTT may use or publicly disclose certain "non-GAAP financial measures" in the course of its financial presentations, earnings releases, earnings conference calls, and otherwise. For these purposes, the U.S. Securities and Exchange Commission ("SEC") defines a "non-GAAP financial measure" as a numerical measure of historical or future financial performance, financial positions, or cash flows that (i) exclude amounts, or is subject to adjustments that effectively exclude amounts, included in the most directly comparable measure calculated and presented in accordance with GAAP in financial statements, and (ii) include amounts, or is subject to adjustments that effectively include amounts, that are excluded from the most directly comparable measure so calculated and presented.

Non-GAAP financial measures are provided as supplemental information to investors to provide an alternative method for assessing GTT's financial condition and operating results. GTT believes that these non-GAAP measures, when taken together with its GAAP financial measures, allow the Company and its investors to better evaluate its performance and profitability. These measures are not in accordance with, or a substitute for, GAAP, and may be different from or inconsistent with non-GAAP financial measures used by other companies. These measures should be used in addition to and in conjunction with results presented in accordance with GAAP, and should not be relied upon to the exclusion of GAAP financial measures.

Pursuant to the requirements of Regulation G, whenever GTT refers to a non-GAAP financial measure it will also present the most directly comparable financial measure calculated and presented in accordance with GAAP, along with a reconciliation of the differences between the non-GAAP financial measure GTT references with such comparable GAAP financial measure.

Adjusted Earnings before Interest, Taxes, Depreciation and Amortization ("Adjusted EBITDA")

Adjusted EBITDA is defined by GTT as net income/(loss) before interest and other expense, net, income tax (benefit) expense and depreciation and amortization ("EBITDA") adjusted to exclude severance, restructuring and other exit costs, acquisition-related transaction and integration costs, losses on extinguishment of debt, share-based compensation, and from time to time, other non-cash or non-recurring items. GTT uses Adjusted EBITDA to evaluate operating performance, and this financial measure is among the primary measures we use for planning and forecasting future periods. GTT further believes that the presentation of Adjusted EBITDA is relevant and useful for investors because it allows investors to view results in a manner similar to the method used by management and makes it easier to compare GTT's results with the results of other companies that have different financing and capital structures. However other companies may define Adjusted EBITDA differently than GTT does, so its Adjusted EBITDA may not be fully comparable with those of other companies. In addition, the Company has debt covenants that are based on a leverage ratio which utilizes a modified EBITDA calculation, as defined in its credit agreement. The modified EBITDA calculation in GTT's credit agreement is similar to its definition of Adjusted EBITDA; however it includes the pro forma Adjusted EBITDA of and expected cost synergies from the companies acquired by GTT during the applicable reporting period. Finally, Adjusted EBITDA results, along with other quantitative and qualitative information, are utilized by management and GTT's compensation committee for purposes of determining bonus payouts to its employees.

Adjusted Free Cash Flow and Adjusted Unlevered Free Cash Flow

Adjusted Free Cash Flow is defined as net cash provided by operating activities less purchases of property and equipment, adjusted to exclude cash paid for severance, restructuring and other exit costs, and acquisition related transaction and integration costs. Adjusted Unlevered Free Cash Flow is defined as Adjusted Free Cash Flow before interest. Adjusted Free Cash Flow and Adjusted Unlevered Free Cash Flow are not a measurement of our financial performance under GAAP and should not be considered in isolation or as alternatives to net cash flows provided by operating activities, total net cash flows, or any other performance measure derived in accordance with GAAP.
